

## RELATIONSHIP CHART

How to use this chart to determine the relationship between any two people in a family.

1. Identify the Common Ancestor of the two people. Locate the box in the upper left corner for the Common Ancestor.
2. Across the top row of the chart, find the relationship of one of the two people to their Common Ancestor.
3. Down the left column of the chart, find the relationship of the second person to their Common Ancestor.
4. Read down the column of the first person and across the chart on the row of the second person. Where the two intersect is the box which identifies their relationship.
